

## Policrom Water Miscible Wash

### Description

Policrom Water Miscible Wash was formulated to be the primary all-purpose, water-miscible blanket and roller wash product for the majority of sheetfed and web-cleaning applications. It is efficient in both economics and performance and is friendly to use. The water-miscible characteristics actually improve ink-cutting power and rinsability, aiding in the elimination of harmful residues which can build up, causing stripping and blinding.

### Directions

**Blankets:** Apply Policrom Water Miscible Wash to a water-dampened cloth; wipe blanket until ink is removed. For best results, follow with a water-dampened cloth to remove all residual contaminants. Alternately, add 20% to 50% water to Policrom Water Miscible Wash in a wash-up bottle. Shake well before using.

**Rollers:** Apply Policrom Water Miscible Wash directly to rollers, engage wash-up blade, allow ink to run off and repeat until ink is removed. Finish with a water rinse to remove all residues.

### Product Need and Usage

In a blanket and roller wash, the printer is looking for a wash that will remove ink, paper, coatings and other contaminants quickly and easily. They want a product that is friendly and economical to use, is compatible with press elastomers and equipment, and compliant with environmental regulations.

### Features

- \* Economical.
- \* Non-damaging to rollers or blankets.
- \* Efficient cleaning power.
- \* Water-miscible – special ink-cutting, rinsable formula.

### Technical Specifications

Drying Speed	Medium
Water-Miscible	Yes
Flash Point (°F TCC)	105
VOC (lb/gal method 24)	6.50
Vapor Pressure (mm HG)	2.79
Odor/Fragrance	Medium / Vanilla
