

Polisport UV All plates are made to work with all varnish types and paper thicknesses.

- 1 The varnishing layer is made of a new, improved, highly compressible PU, to work even with heavy stock cardboard; the surface finish is designed for best varnish release
- 2 The base layer is made of hazy PET which is dimensionally very stable and does not stretch avoiding the risk to lose registration

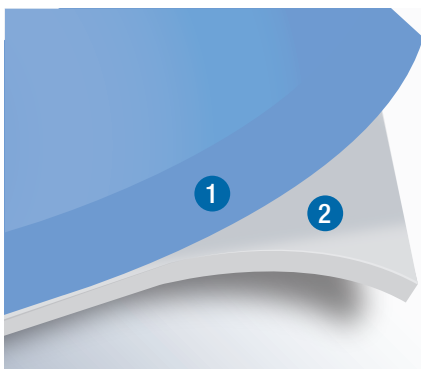

## NEW POLISPOT UV ALL: ALL VARNISHES, ALL PAPERS, TOP COATING RESULTS!

If your wish was to use one coating plate for both UV and water-base varnishes, deliver superior performance with both glossy and matte varnishes, use heavy stock cardboard, then stop looking around: POLISPOT UV ALL is what you need!

- Superior release of both glossy and matte varnishes
- Developed to work with UV varnishes, ideal for water-base as well
- Soft and resilient to work at best with all kinds of paper up to 400 gr. cardboard

### Polispot UV All was developed with the following features

- a surface finish designed for best varnish release, thanks to its calibrated
