

POLISPOT RUBBERTOP 1.15 - 1.35 - 1.95 mm

Technical data sheet

DESCRIPTION	APPLICATION	FEATURES
Rubber varnishing plate on a biaxially oriented polyester film base, manufactured using innovative solventless technology	For in-line spot or flood varnishing in offset applications	• Excellent compressibility • Ground and buffed surface • No ink build up characteristics • Highly resistant to the most common detergents for varnishes • Long run jobs with acrylic (water based) varnishes and U.V. varnishes • Can be used with recycled paper or any other paper with uneven thickness and weigh up 300 g/m2
		Nitrile rubber ----- Closed-cell foam ----- PET Base ----- Non-woven spacer (for only 1.95mm thickness plate)

INSTRUCTIONS FOR USE

- For best cutting make sure that the cutting blade touches the PET base
- Peel gently
- Use a compressible underpacking
- Apply minimum contact pressure between the Anilox© cylinder and the plate, and also between the plate and the pressure cylinder
- Store the product protected from sunlight at a temperature between 5° - 30° Celsius and at a RH ≤ 65%
- Keep at room temperature for 24 h prior to cutting

INSTRUCTION FOR WASHING

- For water based varnishes, use water, better if hot
- For UV, pearlescent and metal varnishes, use isopropyl alcohol

PHYSICAL AND MECHANICAL PROPERTIES

Property	Test method	Unit	Nominal values
Tolerance of thickness	ASTM D 374	mm	± 0.05
Dimensional cutting tolerance (plates)	-	mm	± 0.5
